### THE BUDGET.

We are free to admit that in review-ing the estimates for the fiscal year of 1865, much allowance should be made 1866, much allowance should be made for the Minister who prepared thom; in teods the purples of Hacianda at the 11th hour, after it had been vent round to all the noted financiers in town: he deserves therefore more sympathy than censure at the present monent.

Indianced by such considerations we cannot blasse his Excellency for coming before the public with a budget which on sits face shows a deficit of over half a million of patacons. Of course M. Gonzales is in rather an unpleasant

position, which he tries to escape by asserting that the deficit is purely imaginary, although according to arith-metical calculations it is as plain as 2

metrical calculations it is as pasticus and 3 make four.

In order that our readers may thoroughly comprehend the question, and know the real financial position of the country, we give the Minister's own figures. The following is a schedule of expenses: of expenses :-
