EXTRAORDINARY DEATH

On of the most extraordinary causes of death we have read of, is in a recent number of the 'Reformat'—'Maximilian, King of Bavaria, has died suddeuly, and it appears his death was caused by his indevertently sticking a gold broastqui into his aking white dreasing one morning. Workings of the Saladeres in the

Frestott Veert

From information we have grathered
we can afflire that the saladere workings
of this year assount to the following:
Saladeros of the Mivers; Oriental cest,
Entre Rios and Paranai, 1000,000 head,
Id. Buenos Ayres
1d. Montroider
1d. Montroider
1d. Montroider
1st calculated that at the
end of the year 09,000
will have been killed, 420,000
will have been killed, 420,000

So that we have workings to the amount of 1.69 \, \text{0.00} 0.000 head, which, calculated at 1.29 per lb, valued one with another on account of the small weight this year, ewing to the eminable being so poor, they produce \(2.028 \) \text{0.000} 0 \(\text{uint} \) being borover, they have the amount wer:

In Habana \(1.00 \), 0.000 \(\text{uint} \) uintals.

In Brasil \(1.200 \), 0.000 \(\text{uint} \)

1,800 000

There therefore remains the surplus of 228,000 quintals over last year's amount. Admitting that the English market consumes the 140,000, which have been shipped and are still shipping, yet we have a surplus 67-88,000 quintals for which there is no market, and the world of the still consumer that will undoubtedly diminish the surplus of the stiller. The beautiful and the surplus of the stiller.
