From private advices which, we have received from Gualeguaychu, we are induced to believe that this branch establishment will do a large business. Catase of the Deprecelation of Paper Money.

We have so frequently called attention to the real cause of the depreciation of paper money in this country—the excess of our imports over exports—that we would not now refer to the matter but that we find in a leading financial paper of New York our romarks corroborated. If people will only take the trouble to read the following they will soon learn why, in the absence of fresh emissions, paper money still keeps depreciating:

"During the work just closed, the

dollars were in dry goods and 6,128.599
dollars in general merchandine.
The exports from the port during the week were of domestic produce and immediate one of domestic produce and immediate goods, (exclusive of species), 3,659,897 in currency, and of species, about 3,000,000, or qual to 3,000.
Thus our imports in a single, week were, in currency value equal to 3,000 and 1.850,000 dollars, leaving us inducted on the week's foreign trade to the amount of 4,251,000 dollars. Leaving us inducted on the week's foreign trade to the amount of 4,251,000 dollars. Leaving us inducted on the week's foreign trade to the amount of 4,251,000 dollars. It is hardly nicessary to emphasize the importance of these facts, and of tof their bearing on the public credit. It is abvious that such an extravagant use of foreign productions must embarrass our financial system Very seriously, a natibest hard on our national currency. If our people were as thrifty as they are upon us, we would export more than we import, and save ourselves from the perilous consequence of heavy indebt edness to Europe."
