REVIEW FOR THE PACK.

Owing to this being Holy Week, and the Packet leaving on Easter Sunday, we are constrained to publish our Packet Edition earlier than usual.

The Buenos Ayres Northern Railway is doing a splendid business. We hear that one of the engineers of the company has left town for the purpose of making surveys for the extension of the road to Campana.

From San Juan we have not heard one word since the riot, but it is pretty generally believed that Mr. Rickard will resign the post he holds when Governor Sarmiento leaves for the States.

Boles shares have suffered a depreciation of five per cent.—San Juan Mining Company shares still more. Money is in good demand. Wool and hides firm at current prices, wheat dull and flour falling.

In the province of Entre Rios a horrible murder has lately been perpetrated—a whole family assassinated. Who the murderers are we have not yet heard, but the unfortunate victims were an old man named Retamal, his wife and daughter.

The steamer Menay has been ordered to be inspected by Government, and will, if in sufficiently good condition, be put on the line again between Montevideo and Buenos Ayres.

Colonel Nadal, whose name is so well known in Argentine story, is at present in Montevideo, and made a good deal of; also his comrade Lamela, both of whom have lent their services to put down Flores.

We regret to hear that on last Thursday evening an Englishman, whilst bathing off the mole Gonouliou in Montevideo, was drowned. As yet we have not heard the name of the unfortunate young man.

The Buenos Ayres Great Southern Railway has commenced making the road, and about two hundred men are employed thereon.

The Boca road has also been recommenced, and a vessel laden with iron, &c. (the George Krol), has arrived for this company.

The Western Railway, which belongs to the Government, is also working hard at its extension. In consequence of these roads employing so many hands, labour is dear and scarce.

The port of Buenos Ayres is so crowded at present with vessels that freights have fallen to an extremely low figure, and the shipbrokers are unable to find cargo for one-half the vessels. It may be right for us to observe that any very considerable increase in our imports, even though that increase be in railway iron, tends seriously to augment the depression in freights.

Our Rosario colleague states that the National Government has received proposals from a certain English firm for the establishing of banks of emission throughout the whole Republic; the capital proposed is ten millions of fuertes.

The great Rosario De Boats has been at last liberated, he having arranged to pay a dividend to his creditors, when able.

The firm of Ortiz, brothers, is dissolved, Mr. Frederick Ortiz having retired.

All persons owning real estate in Santa Fe, are required to send in their title-deeds to the Gefe Politico's office, before the 17th April next.

Captain Segundo Romayo is trying to increase the police force. We suppose that the gallant captain would not resort to this step if he did not believe that owing to the liberal dissemination of opinions, rows, &c., are increasing.

The Minister Gravel is a very active man, and much liked. He has notified the Comander of Rosario of an intended invasion of Ludians, requesting him to take his measures accordingly.

A vessel had arrived in Rosario with 441 bars of soap made in Victoria; the townspeople were astonished at such an extraordinary consignment, and think it had better be sent on to San Nicholas, where the soft description is in good demand.

We learn that the inhabitants of San Nicolas intend presenting a petition to the National Government, praying for a bridge in the Arroyo del Medio.

There must be something mysterious and solemn in the wood which spans the Arroyo del Medio—a spot mentioned in all our struggles.

The people of San Nicolas, who have sacrificed so much for the national welfare, have now the honor of having given birth to this work of great material progress, which is, at once, a work of patriotism and of good policy.

We regret to chronicle a frightful murder which took place on the 17th instant. Thomas Murray, the unfortunate victim, was a well to do sheepfarmer, in the Partido of Zarate, where he owned an estancia.

The Paven arrived yesterday morning, bringing us the alarming news of an invasion of Cordova, by the Indians. From the official despatch of Colonel Pizarro, we gather the following particulars:

On the 10th inst., at two o'clock, p.m., the De arment of San Justo was invaded by Indians, who swept the whole country before them. The following are the names of the places where these depredations took place: Piquitas, Corral de Iban, Encarnadas, Mantos de Los Quebrachos y de Los Sanchos. These places are about 20 leagues from this town.

Through an oversight of Mr. Lumb, the concessionary of this railway, the different sections were not published. Below will be found the stations as they are at present decided upon:

- 1—Plaza Constitucion to Barracas. Do 2—Barracas to the Lomas de Zamora. Do 3—Lomas de Zamora to Glerret station. Do 4—Glerret station to San Vicente. Do 5—San Vicente to San Borombon. Do 6—San Borombon to an intermediate station between that and Chascomus. Do 7—From the roadside station to Chascomus.

The 'New York Herald' is particularly severe (and, for a wonder, in a perfectly respectable manner) upon the British claiming General Grant. It says: "It is no longer publicly known that we have a noted man, or smart general, than the British at once lay claim to him as a former subject of their realm."

exception of the tower, nothing on deck, neither masts, rigging, nor anything which could lend one to suppose her to be a vessel.

Disgraceful negligence on the part of the Argentine authorities.—In January last we were plunged into grief by the public mourning for the death of the King of Denmark, and although the event happened somewhere about the year 1860, or a little later, the authorities of this city very properly delivered themselves up to grief, and had, what is called in feminine language, a right good cry.

The late monarch was almost as civilized as some of the Argentine Alcaldes and Jueces de Paz, and during his trip to England, acquired several very enlightened habits.

The Steamship Matanzas, from New Orleans 26th ult. arrived at this port yesterday. She brings the news that an important expedition is fitting out at New Orleans in which the army and navy are to play important parts.

The will of Archbishop Hughes has been offered for probate before Surrogate Tucker. The document does not contain any requests except those of a private nature.

The barque 'Jenny Jones,' from California, was wrecked and all hands lost. A great dinner was given in S. Luis to General Grant who is now the most popular man in the army.

CONGRESS WAS SITTING and several important financial measures under consideration.

NORTHEN RAILWAY. Sydney Smith compared the whistle of a locomotive to the shriek uttered by an attorney on his way to Hades in company of Don Nicolas.

SEVEN DAYS LATER FROM THE U. STATES.

Through the kindness of an American gentleman, we have been favoured with the New York 'Herald' of the 3rd Feb., being 7 days later than the news per last packet.

The rebels in General Kelley's department met with a serious discomfiture yesterday. Col. Mulligan advanced up New creek and re-occupied Burlington and Moorfield Junction, driving the enemy before him.

The deserts from the rebel army into our lines on the Potomac continue to increase daily, and the reports confirm the stories of distress in the Southern ranks.

The will of Archbishop Hughes has been offered for probate before Surrogate Tucker. The document does not contain any requests except those of a private nature.

IMPORTANT CASE. An interesting case has been before the British Consul for some days past. On the passage of the barque Coral Queen, from New York, the boatwain or second mate instigated the crew, or part of them, to rob and pillage the passengers at every opportunity.

The Dictator.—There has just been launched, from the New York Arsenal, a new man-of-war, called the Dictator which is, undoubtedly, the most formidable naval battery afloat. She is 320 feet in length, 52 in breadth, and 72 in depth. She is sheathed with six metal plates, one above the other, each an inch thick, and fastened together by iron bars, four inches in breadth, thus making a sheathing of 10 inches in thickness.
